

# INSTALLATION INSTRUCTIONS

Accessory

**FULL NOSE MASK  
08P35-S6M-200**

Application

Publications No.

**BII 26201**

Issue Date

**SEP 2003**

## PARTS LIST

Mask  
(hood section)

Mask  
(bumper section)

2 Snap-screws

2 Fenderwell nuts

2 Washers

Storage bag

## TOOLS AND SUPPLIES REQUIRED

Stubby #2 Phillips screwdriver

Flat-tip screwdriver

Scissors

## INSTALLATION

### NOTE:

- Make sure the vehicle and the nose mask are clean and completely dry before installation. If moisture under the mask is allowed to dry, it may cloud the paint. If the mask gets wet, remove it and allow it to air-dry completely.
- Make sure any repainted surfaces are cured.
- Make sure the hood and nose of the vehicle have been waxed with a high-quality paste wax.
- Make sure you install the nose mask securely. If the nose mask starts to flap or comes loose while driving, safely pull off the highway, stop the vehicle, and secure or remove the mask.
- This nose mask cannot be installed if the vehicle is equipped with an optional front under spoiler.

### Displaying the License Plate

If your state law requires the display of both license plates, cut out the piece of the bumper section that covers the front license plate:

- Face the inside of the mask toward you.
- Carefully cut out the license plate section with scissors at the top seam, and remove the overcast stitching.

## Installing the Hood Section

1. Open the hood, and remove the two clips from the hood insulator. Save the clips for your customer.

2. Fit the corners of the mask section around the hood. Adjust the mask so that it fits smoothly over the edges. Attach the center "S" hook to the hood.

3. Secure the mask by hooking the four "S" hooks to the holes in the back of the hood.

## Installing the Bumper Section

4. Turn the steering wheel all the way clockwise.
5. Pry out the plastic pin, and remove the expansion clip that fastens the inner fender; remove and retain the clip, then clean the area around the hole.

6. Pull the inner fender away, and press one fenderwell nut (supplied) into the hole in the fender flange.
7. With its washer in place, securely tighten one snap-screw into the fenderwell nut.
8. Turn the steering wheel all the way counter-clockwise, and repeat steps 4 through 7 on the other side of the vehicle.
9. Slip the pocket of the mask's fender section onto the front corner of the fender, then attach the plastic hook to the fender support. Fit the mask across the bumper, and attach the mask to the other side in the same way.

- Pull the mask back toward the wheelwell, smooth out any wrinkles, and then snap the mask onto the snap-screw. Repeat on the other side.

- On both sides of the vehicle, attach the three plastic hooks to the fenderwell.
- Insert the tab under the front grille, and attach the "S" hook to the headlight.

- Insert the three tabs into the edges of the headlight. Repeat on the other side.

- Attach the two outer "S" hooks to the top edge of the bumper opening, and attach the four plastic hooks to the bottom edge of the bumper opening.

- Attach the five "S" hooks to the holes in the bottom of the front bumper.

16. Route the two belts through the holes in the front grille, and attach them to the inner "S" hooks.

17. Put these instructions and the expansion clips removed in step 5 in the glove box.

### CLEANING THE NOSE MASK

Use a sponge or cloth and a solution of mild liquid dishwashing soap and water to clean the vinyl and the flannel backing. Rinse the mask completely with clean water, and hang it to dry, out of direct sunlight. Make sure the mask is completely dry before you reinstall it.
